EDUCATION

KL University, Vijayawada

CGPA: 9.2/10.0 (Top 5% of cohort)

B.Tech in Computer Science and Engineering

2022 – 2026

- Courses: Distributed Systems, Cloud Computing, Computer Networks, Operating Systems, Data Structures & Algorithms, Database Management Systems.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, VPC, Lambda, IAM, RDS, ECS, EKS, Route53) · GCP (BigQuery, IAM) · Azure (core services, ARM templates)

Infrastructure as Code: Terraform · Ansible · working exposure to AWS CloudFormation & Azure ARM

CI/CD & Supply-Chain Security: Jenkins · GitHub Actions · ArgoCD/GitOps · Semgrep · Trivy · gitleaks · Cosign/SLSA

Containers: Docker & Docker Compose · Kubernetes · Istio (mTLS, zero-trust) · Helm

Scripting: Python (boto3, FastAPI, REST APIs) · Bash · Shell · PowerShell · YAML · SQL

Monitoring & Support: Prometheus · Grafana · Datadog · CloudWatch · OWASP · JIRA

Databases: PostgreSQL · MongoDB · MySQL · BigQuery

EXPERIENCE

Millennium Software Solutions

May 2026 – Present

AWS & DevOps Trainee

Vizag, India

- Provision and manage **AWS** infrastructure (EC2, VPC, S3, Lambda, IAM, RDS) using **Terraform** for repeatable, version-controlled deployments.
- Design and troubleshoot **cloud networking** — VPCs, subnets, routing tables, security groups, and DNS — to support reliable service connectivity.
- Automate operational and deployment tasks using **Python** and **Bash** scripting, and build **CI/CD pipelines** (Jenkins, GitHub Actions) for containerized applications.
- Work with **Docker** and **Kubernetes** for containerized workloads, and set up **monitoring** (Prometheus, Grafana, CloudWatch) for production troubleshooting.

NextCX.ai — AI-driven Customer Experience Platform

Jul 2025 – Dec 2025

DevOps Engineer

Remote

- Monitored cloud infrastructure availability and performance via **Datadog** and **CloudWatch** — triaged incidents and executed documented runbook procedures; reduced mean time to resolution by **25%** and system downtime by **30%**.
- Managed structured incident escalation workflows with **RCA reports** and **JIRA** tickets — contributed to **99.9% SLA uptime** across environments.
- Built **CI/CD pipelines** with automated security gates (OWASP, Trivy, SonarQube) and **Python/Bash** self-healing scripts — cut build vulnerabilities by **40%** and manual effort by **40%**.

PROJECTS

Ledger Security Hardening | *Kubernetes, Istio, GitHub Actions, Semgrep, Trivy, Cosign/SLSA*

2026

- Hardened a PCI-DSS-scoped microservice with 5 layered controls: non-root, read-only-filesystem containers, dropped capabilities, Sealed Secrets, and a Kyverno admission policy blocking root/unsigned workloads.
- Rebuilt the delivery pipeline with fail-closed SAST/secrets/CVE gates, Cosign keyless signing, and SLSA provenance attestation — full pipeline passing end to end in **2m 18s**; layered Istio mTLS (STRICT) with default-deny NetworkPolicy, validated with an authorized recon and penetration test.

GitOps Platform on AWS EKS | *Terraform, EKS, ArgoCD, Prometheus*

2026

- Provisioned AWS VPC, subnets, IAM, and EKS using Terraform IaC with remote state management; implemented CI/CD with ArgoCD GitOps and GitHub Actions, plus Prometheus/Grafana dashboards for SLO tracking.

Real-Time Chat Platform | *AWS EC2, Docker Compose, Nginx, FastAPI, GitHub Actions*

2026

- Diagnosed and fixed three independent infrastructure defects in a broken deployment — a backend bound to the wrong interface, a missing volume mount, and a misrouted Nginx `proxy_pass` — then deployed the fixed stack to AWS EC2 with an automated GitHub Actions SSH pipeline.

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications** – AWS Certified Cloud Practitioner, Salesforce Certified AI Associate, Red Hat Certified Enterprise Application Developer.
- **Publication & Writing** – AI agent-based cloud observability system (Springer, ICIDDM 2K25); 26 technical articles on Hashnode; 21 public GitHub repositories.
- **Powerlifting** – National Powerlifting Champion (IPF) — 3 Gold Medals.
